Jiani (Elva) He

Data Science Consultant · Independent Researcher
Seattle, Washington | jiani19980225@gmail.com | jiani19980225.github.io | LinkedIn | Google Scholar

RESEARCH INTERESTS

Demand-forecast stability and planning value; causal decision support under partial information; trustworthy deployment of AI systems; AI-assisted reverse logistics.

This work corresponds to AI subfields on the U.S. Critical and Emerging Technologies List, including planning, reasoning, and decision making, and AI assurance and assessment techniques.

PROFESSIONAL EXPERIENCE

Accenture
Jun 2024 - Present
Data Science Consultant
Seattle, Washington

- Lead planning analyses, manage client relationships, and present recommendations to senior leaders.
- Analyze reverse-logistics cycle time and on-time delivery in SQL to identify bottlenecks; guide reuse, resale, recycling, or disposal decisions based on asset value and lifecycle stage.
- Analyze stock targets, available inventory, and demand; use an optimization engine to rebalance inventory across sites, address shortages, and maintain adequate supply.
- Plan quality-assurance component quantities using demand and bill-of-materials data; define service metrics and support automated inventory adjustments.
- Standardize prompts and analytical queries for enterprise LLM assistants; develop reusable guides and train analysts in AI-assisted analysis.

Accenture
Oct 2021 - May 2024
Data Science Senior Analyst
Seattle, Washington

- Built SQL dashboards and shortage alerts to compare inventory with demand and inform transfers between sites.
- Tracked reverse-logistics cycle times and on-time delivery; flagged bottlenecks and supported asset reuse, disposal, and recovery scheduling.
- Investigated inventory imbalances and abnormal cycle times using SQL and statistical analysis; automated reporting and purchase-order workflows.
- Across both Accenture roles, mentored five junior analysts in SQL, business problem solving, and client communication; led onboarding and team training.

BMW Group
Feb - Aug 2021
Data Scientist Intern · MIT Capstone, Dynamic Vehicle Pricing
Cambridge, Massachusetts

- Modeled vehicle demand and cross-price elasticity in Python to recommend discounts by customer segment and sales channel; built Tableau pricing dashboards.

EDUCATION

Massachusetts Institute of Technology
Aug 2021
MS, Business Analytics · Operations Research Center | GPA 4.7 / 5.0
Cambridge, Massachusetts

Classification trees for 40,000 news articles (Python/Julia) and robust bike-allocation models (Julia). Analytics Lab: an NLP admissions Q&A pipeline for AdmitHub with response evaluation and human review.

Purdue University
May 2020
BS, Industrial Engineering · Honors & Distinction | GPA 3.9 / 4.0
West Lafayette, Indiana

LSTM forecasting models (Keras) and reinforcement learning for sensor placement (Python/R).

SERVICE & MENTORING

- Peer reviewer for 10+ journal manuscripts.
- Mentored five junior analysts across Accenture roles; led onboarding and team training, including AI-assisted analysis.

SKILLS

Tools: SQL, Python, R, Julia, Keras, Tableau, AWS

Modeling: Machine learning, Forecasting, Regression, Classification, Clustering, Robust optimization

Analytics & BI: Statistical analysis, Root-cause analysis, Data visualization, Dashboards, KPI design

AI: Generative AI, NLP, LLM workflows, Prompt & query design

Consulting: Problem framing, Client communication, Stakeholder coordination, Project delivery, Mentoring
